

YOUR WORKING CHECKLIST

T-related evidence: a privacy-first document index

How can a trafficking-related research file be indexed without exposing sensitive details unnecessarily?

Use neutral document labels to organize a T-related file while keeping sensitive originals privately held. The index can identify the source, event and access limitations without turning a preparation tool into a public account of exploitation.

Check the boxes on screen or by hand. Use the notes area for records to find and questions to ask.

Your preparation checklist

- ☐ Index private contact with its source and event date.
- ☐ Index record inventory with its source and event date.
- ☐ Index institutional account with its source and event date.
- ☐ Index immigration history with its source and event date.
- ☐ Mark missing or conflicting information without inventing an answer.
- ☐ Compare the finished index with current official instructions before relying on it.

Notes and questions to follow up
