

YOUR WORKING CHECKLIST

Protect USCIS account access and recovery information

How can I protect my USCIS account when I receive codes or need help signing in?

Use the official account interface, protect the account's unique credentials and authentication codes, and preserve recovery information privately. Distinguish an official security step from a third party asking for access. This guide organizes security checks and support questions without requesting credentials, changing an account or guaranteeing protection from misuse.

Check the boxes on screen or by hand. Use the notes area for records to find and questions to ask.

Your preparation checklist

- ☐ Check the domain before entering credentials.
- ☐ Treat authentication and recovery codes as private.
- ☐ Define assistance without surrendering account ownership.
- ☐ Use official support for access failures.
- ☐ Preserve evidence of the security issue safely.

Notes and questions to follow up
